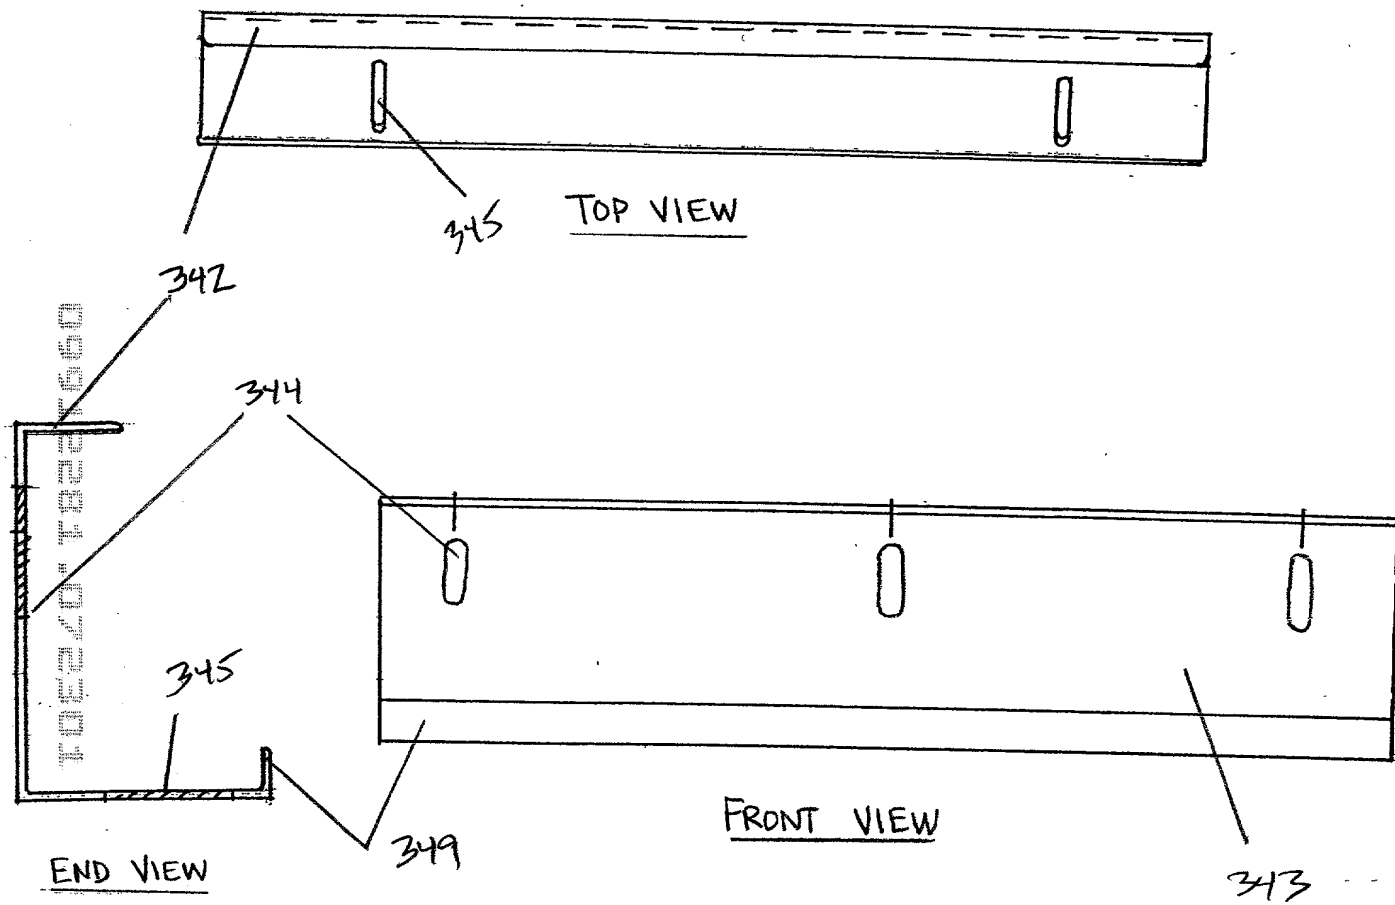

FIG. 47

The diagram shows three orthographic views of a mechanical part:

- TOP VIEW:** A rectangular view at the top showing a slot on the left and a circular feature on the right. A dimension line labeled **245** indicates the width of the slot.
- END VIEW:** A stepped profile view on the left. A dimension line labeled **341** indicates the height of the upper section.
- FRONT VIEW:** A view on the right showing the part's profile with a horizontal section line. A dimension line labeled **346** indicates the width of the base.

Hidden edges are represented by dashed lines. Break symbols (zig-zag lines) are used to indicate that the part is longer than shown.

F16 48

A hand-drawn perspective view of the device. It shows a rectangular base with four circular features (possibly screws or holes) along its top edge. A vertical support structure rises from the base, featuring a horizontal arm and a vertical post. A diagonal line connects the top of the vertical post to the top of the horizontal arm. The label "SIDE" is written below the perspective view. A leader line points from the label "347" to the top of the vertical post. Another leader line points from the label "348" to the top of the horizontal arm.
